VT-PTZ12WH
Ultra Compact 960H PTZ Camera
with 12X Optical Zoom and WDR

• 1/4" Sony Super HAD II CCD with 700 TV Lines (960H)
• Built-In 3.8mm to 45.6mm Lens with 12x Optical / 32x Digital Zoom
• True Day/Night function with ICR
• 128 Presets programmed with view direction, zoom, and BLC
• 4 Patterns record and play back user preference of surveillance path up to 120° sec.
• 8 Scans: 8 speed steps from slow to medium panning with smooth Diagonal Scan
• 4 Tours: Each tour consists up to 32 Presets, Patterns, and/or Scans
• Fully Gasket Sealed IP-66 Rated Weatherproof Design
• 4 Alarm inputs with 1~4 priority / 1 Auxiliary output with programmable NC & NO
• 8 Privacy Zones: Video off or up to 8 masked blocks
• 64 steps of variable speed from 0.4°/sec to 90°/sec. Max manual speed 190°/sec with Turbo key pressed, Preset speed is 380°/sec.
• Built-in RS-485 receiver driver.
• Built-in power-line surge protection and lightning protection
• Built-in Heater/Blower for use in Extreme Temperatures
UNPACKING

Before installing the Dome camera, please make sure that the following items are included in the box:

1. Mini Speed Dome Camera
2. Instruction Manual
3. Mounting Hardware

If any of these materials are missing, please contact the vendor or VITEK customer help desk immediately.
DISCLAIMER

• While every effort has been made to ensure that the information contained in this guide is accurate and complete, no liability can be accepted for any errors or omissions.
• VITEK reserves the right to change the specifications of the hardware and software described herein at any time without prior notice.
• No part of this guide may be reproduced, transmitted, transcribed, stored in a retrieval system, or translated into any language in any form, by any means, without prior written permission of VITEK.
• VITEK makes no warranties for damages resulting from corrupted or lost data due to a mistaken operation or malfunction of the Speed Dome Cameras, peripheral devices, or unapproved/unsupported devices.
WARNING AND CAUTION

WARNING

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR MOISTURE. DO NOT INSERT ANY OBJECT THROUGH THE VENTILATION GRILLS OR OTHER OPENINGS ON THE EQUIPMENT.

CAUTION

EXPLANATION OF GRAPHICAL SYMBOLS

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instruction in the literature accompanying the product.
FCC COMPLIANCE STATEMENT

FCC INFORMATION: THIS EQUIPMENT HAS BEEN TESTED AND FOUND TO COMPLY WITH THE LIMITS FOR A CLASS A DIGITAL DEVICE, PURSUANT TO PART 15 OF THE FCC RULES. THESE LIMITS ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST HARMFUL INTERFERENCE WHEN THE EQUIPMENT IS OPERATED IN A COMMERCIAL ENVIRONMENT. THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE HARMFUL INTERFERENCE TO RADIO COMMUNICATIONS. OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE HARMFUL INTERFERENCE IN WHICH CASE THE USER WILL BE REQUIRED TO CORRECT THE INTERFERENCE AT THEIR OWN EXPENSE.

CAUTION: CHANGES OR MODIFICATIONS NOT EXPRESSLY APPROVED BY THE PARTY RESPONSIBLE FOR COMPLIANCE COULD VOID THE USER’S AUTHORITY TO OPERATE THE EQUIPMENT.

THIS CLASS A DIGITAL EQUIPMENT COMPLIES WITH CANADIAN ICES-003.

CET APPAREIL NUMÉRIQUE DE LA CLASSE A EST CONFORME À LA NORME NMB-003 DU CANADA.

CE COMPLIANCE STATEMENT

WARNING

THIS IS A CLASS A PRODUCT. IN A DOMESTIC ENVIRONMENT THIS PRODUCT MAY CAUSE RADIO INTERFERENCE IN WHICH CASE THE USER MAY BE REQUIRED TO TAKE ADEQUATE MEASURES.
IMPORTANT SAFEGUARDS

1. Read these instructions.
2. Heed all warnings.
3. Follow all instructions.
4. Do not use this equipment near water.
5. Clean only with dry cloth.
6. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
7. Do not install near any heat sources such as radiators, heat registers, stoves, or other equipment (including amplifiers) that produce heat.
8. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong is provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
9. Protect the power cord from being walked on or pinched, particularly at plugs, convenience receptacles, and the point where they exit from the equipment. Only use attachments/accessories specified by the manufacturer.
10. Unplug this equipment during lightning storms or when unused for long periods of time.
11. Refer all servicing to qualified service personnel. Servicing is required when the equipment has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the equipment, the equipment has been exposed to rain or moisture, does not operate normally, or has been dropped.

CAUTION - THESE SERVICING INSTRUCTIONS ARE FOR USE BY QUALIFIED SERVICE PERSONNEL ONLY. TO REDUCE THE RISK OF ELECTRIC SHOCK DO NOT PERFORM ANY SERVICING OTHER THAN THAT CONTAINED IN THE OPERATING INSTRUCTIONS UNLESS YOU ARE QUALIFIED TO DO SO.

Use Certified/Listed Class 2 power supply transformer only.

I. INTRODUCTION

Features

The Speed Dome Camera features a high resolution 1/4” Interline Transfer CCD imager for enhanced lowlight sensitivity. User friendly, on-screen pull-down menus and shortcuts make it easy to setup and program functions.

System information aids trouble shooting by displaying the hardware and software version of the camera’s firmware version, baud rate, and protocol.

• Built-in 10X times Optical Power Zoom Camera.
  True Night Shot function with ICR Day/Night function.
• 128 Presets programmed with view direction, zoom, and BLC.
• 4 Patterns record and play back user preference of surveillance path up to 120 sec.
• 8 Scans: 8 speed steps from slow to medium panning with smooth DiagonalScan.
• 4 Tours: Each tour consists up to 32 Preset, Pattern, and Scan.
  Smooth DiagonalScan mode and programmable Individual dwell time camera functions.
  (Speed, Dwell time BLC, Focus, IRIS of the preset)
• 4 Alarm inputs with 1~4 priority / 1 Auxiliary outputs programmable NC & NO.
• 8 Privacy Zones: Video off or up to 8 masked zones.
• 64 steps of variable speed from 0.4°/sec to 90°/sec.
  Max manual speed 190°/sec with Turbo key pressed, Preset speed is 380°/sec.
• Programmable user preferences of speed (Slow, Medium, and Fast).
• Addressable up to 99 camera IDs (Extendable up to 3999 in special mode).
• Built-in RS-485 receiver driver.
• On-site software upgrade and upload/download of programmed data into the KBD/Dome.
• Built-in power-line surge protection and lightning protection.
• Optional Tinted Bubble, Indoor & Outdoor pendant housing, Heater & Blower.
  Flush Mount Kit
II. INSTALLATION AND CONFIGURATION

2.1 Typical System Configuration

Additional Speed Dome joystick controllers and a variety of external switching devices such as multiplexers (MUXes) and Digital Video Recorders (DVRs) may be incorporated to accommodate the needs from a small to a large surveillance/security system. Figure 1 illustrates sample installation.

Figure 1 - Typical System Configuration
2.2 Basic Configuration of Speed Dome Camera System

Figure 2 - Basic Installation Diagram
2.3 Connecting the Speed Dome directly into the DVR

- Locate the RS485 + & - conductor wire from the Speed Dome Camera.
- Connect the + & - into the TRX+ & TRX- ports of the DVR. Tx+ & Tx- ports can be found in the rear part of the DVR.

![Diagram of camera connection to DVR](image1)

Figure 3 - Camera into DVR

2.4 Connecting the Speed Dome into the Controller via J-box

![Diagram of camera connection to controller](image2)

Figure 4 - Camera into Controller
2.5 Connecting Both Speed Dome and DVR via J-box

Figure 5 - Connecting Camera & DVR into Controller
The dome camera must be installed by qualified service personnel. Before installing the dome camera system, this instruction manual must be read thoroughly and understood fully. Dome cameras must be set up properly before starting the installation. This involves properly setting configuration switches. Figure 6 shows the location of these switches.

![Diagram of dome camera with labels: 4 Alarm Input, 1 Aux Output, Heater AC 24V~, Power AC 24V~, Comm. (RX/TX), Video, Selection Switches, Address (ID), Termination Protocol, Fan.]

Figure 6 - Layout of Switches
2.6 Principle of Termination

There are two general types of wiring scheme for PTZ cameras:

- Daisy-Chain Wiring
- Home-Run Wiring

Each scheme has a different termination method

Daisy-Chain Wiring

Every device that is connected at the end of the communication data line (daisy-chain) must be terminated by either the DIP switch setting or an appropriate device such as a termination jumper to prevent potential control signal errors. Usually this means only the last camera in the chain is terminated.

Home-Run Wiring

Home-run wiring forms a star shape. Each camera connects to one central location on the star. That central location is usually the junction-box of a keyboard or may also be the RS-485 input to a DVR. With home-run wiring, none of the cameras should be terminated.

See Figure 6 for termination switch settings and Figure 7 for examples of devices requiring termination. Note: Total length of the cable for communication should not exceed 1.2Km or .74 mile.

<table>
<thead>
<tr>
<th></th>
<th>S5</th>
<th>D1</th>
<th>D2</th>
<th>D3</th>
<th>D4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Terminated</td>
<td>Unused</td>
<td></td>
<td>X</td>

<td>ON</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Normal **</td>
<td>OFF</td>
<td>OFF</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

** Unless communication error, put the position 2, 3 of the S5 in OFF state. Position 2, 3 should be set as a pair. (Both 2, 3 to ON position or OFF position)
2.7 Dome Camera Address (ID)

Each dome camera must have a unique address (ID). Identical IDs on the same line may damage the control circuit caused by an electrical short. When installing multiple dome cameras or a DVR, it is recommended that the dome camera ID’s be identical to the camera port of the DVR.
Cam Port 1 = Dome ID 1, Cam Port 2 = Dome ID 2 … Cam Port 16 = Dome ID 16.

If more than 16 dome cameras are installed using two or more DVRs the following formula is useful to determine the Dome ID: $ID = 16 \times (n-1) + m$ (where $n$ = number of DVR, $m$ = Camera Port)

Refer to Figures 9 for setting the dome camera address (ID) and protocol selection.

![Dome ID Setting Diagram]

**Figure 9 - Setting Dome Camera Address (ID) and Protocol**

### 2.8 Setting Protocols

A Speed Dome camera is capable of negotiating with multiple protocols if the communication speed is matched (same baud rate i.e., 9600 bps). See Figure 10 for the appropriate protocol switch settings.

Note: Consult service personnel if a dome camera is installed with a device other than a recommended Speed Dome Controller.

![Protocol Selection Table]

**Figure 10 - Protocol Selection tables**
2.9 Connections

• How to Connect RS485

The dome camera has a built-in RS-485 receiver so that it can be controlled remotely by an external control device such as a joystick controller or a DVR.

RS-485: Connect the TXA (Tx+) and TXB (Tx-) of the RS485 control devices (KBD, DVR…) to TRX+, TRX- of the dome camera.

RS-485 does not allow for a star connection layout. A splitter is required if a star connection layout is desired. RS-485 guarantees 1.2 Km of data line routing. A repeater is recommended to extend over 1.2 Km.

• Connecting Video output

Figure 2 – Basic installation diagram

• Connecting Alarms

AL1 to 4 (Alarm In)

Magnetic, PIR or other external sensor devices can be used to signal the dome camera reacting to an event.

See Chapter 3.2 — Program and Operation for configuring alarm input.

GND (Ground)

NOTE: All the connectors marked GND are common.

Connect the ground of the Alarm input and/or alarm output to the GND connector.

NO / NC (Normally Opened or Normally Closed dry contact relay output)

The dome camera can activate external devices such as buzzers or lights using dry contact relays. Connect the device to the NO (NC) (Alarm Out) and COM (Common) connectors. See Chapter 3 — Program and Operation for configuring alarm output.

• Connecting the Power

Connect AC 24V 40VA power to the dome camera.

Use certified / Listed Class 2 power supply transformer only.
3.0 Mounting the Dome Camera

Once all DIP switches are set properly and all external connections are made, the dome camera can be mounted.

The Mini PTZ Dome camera is designed to mount on a structural body supporting loads up to 3 Kg. See Figure 11.

*Installation Hint*
*Using Four ST4X30 screws, affix flush mount base to sturdy surface*

*Figure 11 - Example of a flush mounted installation*
3.1 Power on and Boot-up Sequence

When the power is applied to the dome camera, it will start the boot-up sequence. When boot-up is done, the following information is displayed on the monitor screen.

![On Screen Display in normal control mode](image)

- RAM TEST
  - CHECK NO. : OK!

III. PROGRAM & OPERATION

Dome Camera Selection

Prior to start programming or operating a dome camera, please make sure that both the camera and the joystick controller are communicating. In order for changes to take effect for a camera, particular camera’s ID must be selected on the controller.

Example: Pressing 1, 6 and CAM key sequentially will select dome camera 16. The selected dome camera ID will be displayed on the monitor.

Principle of joystick usage in the programming (editing) mode

<table>

3.1 FUNCTIONS

By pressing the MENU button on the keyboard controller, the following On-screen MAIN MENU will be shown on the monitor screen.
Select the **FUNCTIONS** and then move the joystick to the right to access **FUNCTIONS** menu.

![FUNCTIONS Menu](image)

### 3.1.1 HOME FUNCTION (**MENU** => **FUNCTIONS** => **HOME FUNCTION**)

After **HOME FUNCTION** item has been selected, follow the directions below to set **HOME** function.

![HOME Function](image)

**FUNCTION** : Tour/ Preset/ Pattern/ Autoscan  
**NUMBER** : ---  
**TIME** : 60 SEC  
**OPERATION** : DISABLE  
**SAVE AND EXIT**

The **HOME** function applies to the predefined functions such as Preset, Tour, Pattern, or Scan function after the keyboard controller has been idle for a programmed time.

Follow the steps below to program the **Home** function:

1. Using keyboard Select the camera by pressing **Dome ID** and **CAM**
2. Press **MENU** to display the main menu on the monitor.
3. Moving the **Joystick** highlight and tap to the right on “**FUNCTIONS**”.
4. Enter Home Function menu by moving the **Joystick** to the right.
5. Moving the **Joystick** to the right/ left (or twist CCW/CW) to scroll Tour, Pattern, and Auto Scan and Preset functions.
6. Select Function Number by pulling the Joystick down, and twist the Joystick to the CCW/CW (or turn right/left). The executable function number will be scrolled. If selected function is not programmed, it won’t change. Go to setup function first.
7. Pull the Joystick down and twist the Joystick to CCW/CW (or twist the joystick to right/left) to set waiting time.
8. Highlight OPERATION option by pulling the Joystick down. Choose operation status Enable or Disable by moving the Joystick to the right or to the left (or twist CCW/CW).

3.1.2 PRESET (MENU => FUNCTIONS => PRESET Short Cut: PRST)

Preset stores pan, tilt, zoom, focus and iris settings. Once programmed, pressing combination of 0 ~ 9 numbers and the Preset button on the controller should automatically call up the preset position. Presets may be assigned to alarm actions or as the “home” position for the dome camera.

Highlight PRESET and then move the joystick to the right to enter PRESET menu.

There are 8 pages of preset programming menu. Each page can hold up to 8 presets. Locate the “PREV NEXT”, preset menu pages can be scrolled by moving the Joystick to the Left or Right on the “PREV NEXT”.
Follow the steps below to program the Preset positions.

1. Select the camera number by pressing 0 ~ 9 and CAM.
2. Simply press PRST button to enter preset menu. (MENU => FUNCTIONS => PRESET)
3. Select the empty preset location to be programmed by moving the Joystick up/down. If selected location is not empty, pressing PRST button will display the predefined position.
4. You can delete by selecting and pressing the off button on the keyboard. (If selecting an empty position, twist the joystick CCW/CW to start PTZ control for view selection.)
5. After aiming the camera (view direction and lens control) to a specific position, press the Focus (Near and Far) buttons. The selected location No. field will be filled with “A A F”. Move the joystick to the right to manually set Focus /Iris /BLC or WDR mode for each preset.
6. Move to the title field to edit/enter the name. Rotate the handle CW and CCW to scroll through the alphanumeric characters. Moving the handle to right or left to select next or previous digit.
7. To finish entering the title, move the Joystick up/down.
8. Locate the cursor on “PREV NEXT” item to select the previous/next page of presets, scroll through the page by moving the Joystick to the Left on “PREV NEXT”.
9. Repeat the steps 2 through 8 for each additional preset position.
10. Select Save and Exit by moving the Joystick to the right. Press ESC to exit the Preset menu without saving.
NOTE: Press the Home or OFF button at programmed position to delete the preset.

SHORTCUT TO PROGRAMMING PRESETS.

Select direction of the camera, zoom and focus to be programmed, then press No. (1~64), and then press SHFT, PRST subsequently. The current view will be stored to the selected preset number if position is empty. If selected preset number is not empty, “PRESET EXISTING” message will be displayed on the monitor and you will be prompted to overwrite.

Example: 1, 0 + SHFT + PRST will memorize current view as preset No. 10. In this case, focus and Iris mode will be memorized as auto and dwell time will be set to 3 sec.

3.1.3 PATTERN (MENU => FUNCTIONS => PATTERNS or Shortcut: PTRN)

The Pattern function memorizes and stores movement of the selected dome camera for up to 120 seconds. Pattern can be stored in 120 seconds of total recording space. Stored pattern is played back by pressing No. + PTRN buttons subsequently.

```
<table>
<thead>
<tr>
<th>NO.</th>
<th>TITLE</th>
<th>SEC</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>xxxxxxxxxxxx</td>
<td>000</td>
</tr>
<tr>
<td>02</td>
<td>xxxxxxxxxxxx</td>
<td></td>
</tr>
<tr>
<td>03</td>
<td>xxxxxxxxxxxx</td>
<td></td>
</tr>
<tr>
<td>04</td>
<td>xxxxxxxxxxxx</td>
<td></td>
</tr>
<tr>
<td></td>
<td>TOTAL :</td>
<td>000</td>
</tr>
</tbody>
</table>
```

SAVE AND EXIT

Follow the steps below to program the Pattern:

1. Simply press the PTRN key. (or MENU => FUNCTIONS => PATTERN)
2. Select the empty Pattern number to be programmed by moving the Joystick Up or Down. If SEC column is not 000, then the selected No. of pattern is already recorded.
3. Twist joystick CCW/CW, The pattern movement will automatically start recording until the focus button is pressed. This procedure can be repeated to reprogram the pattern.
4. Scroll down to the Save and Exit option and move the Joystick to the right to save and exit.
5. Move to the title field to edit/enter the name. Rotate the handle CW and CCW to scroll through the alphanumeric characters. Moving the handle to right or left to select next or previous digit.

6. To finish entering the title, move the **Joystick** up/down.

7. Pressing [ESC] will not save recorded data and will exit to the previous menu. Press the [HOME] or [OFF] button at any programmed position to delete the programmed pattern.

**NOTE:** If total recording time reaches 120 seconds, it will automatically stop for a moment and start recording again. Previous data will be overwritten.

3.1.4 SCAN ( [MENU] => FUNCTIONS => SCAN or Shortcut: **SCAN**)

The Scan function supports up to 8 programmed sections of angles at 8 programmable speeds.

```
SCAN MENU 01/8

SCAN 01 : AUTOSCANN01
SPEED   : 1~8/SLW/MID
START   : NONE
END     : NONE
DIRECTION: CCW
SWAP    : OFF
SAVE AND EXIT
```

**SPEED (MODE):**  1/ 2/ 3/ 4/ 5/ 6/ 7/ 8/ SLOW / MEDIUM

1: SLOWER ↔ 8 FASTER
SLW : smooth DiagonalScan in slowest speed
MID : smooth DiagonalScan in medium speed
DiagonalScan shows moving path from start point to end point including tilt and zoom** simultaneously.
**Some models do not change zoom ratio
Follow the steps below to program Scans.

1. Press the **SCAN** key to enter Auto Scan menu directly. (Or **MENU** => **FUNCTIONS** => **SCAN**).

2. Select an Auto Scan number by moving the **Joystick** left or right.

3. Highlight the title and twist the **Joystick** to edit the title by scrolling through the alphanumeric characters and move the handle to the right or left to move to the next space. Press **ENTR** key or move the **Joystick** down to finish title mode.

4. When finish entering the title, highlight “START” with the **Joystick and twist CCW or CW**. Current panning position will be displayed. Select start potion then Press Focus button to complete the selection of the start position.

5. Highlight "END" and repeat step 4 to enter end position. (Or hit zoom button to start PTZ control and hit the Focus button to stop.)

6. Move the joystick and select "SPEED" set the speed by twisting the **Joystick** clockwise or counterclockwise or move the **Joystick** left/ right to select the auto scan speed.

7. Move the **Joystick** downward to select direction of rotation. Tap **Joystick** left/ right or twist CCW/CW to select direction of Scan.

8. Move the **Joystick** downward to swap. This will switch the start and end position. Tap **Joystick** left/ right or twist CCW/CW to swap the start and end position.

Pressing the **HOME** or **OFF** button to delete stored data, **000** will be displayed immediately.
There are 4 programmable Tours. Each Tour consists of up to 8 Preset positions, Patterns, Scans or other Tours. Using second-level Tours, it can be expanded up to 56 functions in a single Tour. However, tours in the second level Tour will be ignored when called by the first level Tour. This can be best illustrated by the following example:

**If** Tour 01: Preset 02, Preset 03, Tour 02, Tour 03
Tour 02: Preset 05, Preset 06, Tour 04, Preset 05
Tour 03: Preset 07, Pattern 01
Tour 04: Preset 08, Preset 05, Pattern 01

Tour 1 executes as follows:
Preset 02 ➞ Preset 03 ➞ Preset 05 ➞ Preset 06 ➞ Preset 05 ➞ Preset 07 ➞ Pattern 01 ➞ ... (Repeat)  ---Tour 04 in Tour 02 will be skipped in Tour 01

Tour 02 executes as follows:
Preset 05 ➞ Preset 06 ➞ Preset 08 ➞ Preset 05 ➞ Pattern 01 ➞ Preset 05
... Repeat  (Tour 04 is still valid if called directly from Tour 02.)

| xxxxx : 16 digits of title for tour label |
| --- : blank preset position |
| Speed : F-Normal/ M- Medium D.Scan/ S- Slowest |
| D.Scan |
| DWell : 03-99 Sec |
| PRST : PRESET 1~64 |
| PTRN : PATTERN 1 |
| SCAN : SCAN 1~4 |
| TOUR : TOUR 2~4 |
Follow the steps below to program the Tours:

1. Press **MENU** => **FUNCTIONS** => **TOUR**, (Short Cut: **TOUR**) to display the main menu on the monitor. **No.** + **SHIFT**+**TOUR** will open directly Tour **No.**
2. Choose an empty location of function by moving the **Joystick** up or down.
3. Stored Preset view can be recalled by pressing **Preset** button, the camera will move to the stored Preset view.
4. To place predefined functions as a Tour, press the function buttons (such as **Tour**, **Ptrn**, or **Scan**) .
   Then select function No. by twisting the Zoom handle. (Programmed function No. will be scrolled).
   To remove functions from the Tour, press the **HOME** or **Off** button, blank position mark (---) will be displayed. You can overwrite the programmed position.
5. Repeat Step 2 through 4 for each desired position. Each title will be displayed on top of the line.
6. Up to 8 Presets, Tours, Patterns Scans can be selected for a Tour. You can expand the Tour sequence by calling other programmed tours. Moving the **Joystick** handle to right or left while the cursor is on the top of the line (TOUR 01) to select another page of the Tour menu. (TOUR 01)
7. You can enter a title for the selected Tour by twisting the **Joystick** while the cursor is on the top of the line (TOUR 01). Rotate the handle clockwise or counterclockwise to scroll through the alphanumeric characters. Move the handle to the right or left to select the next or previous digit.
8. Select Save and Exit by moving the **Joystick** to the right. Press **ESC** to exit the program without saving.

NOTE: All functions should be programmed before being referred to in the tour menu. Otherwise functions won’t be selectable by item 4 in the procedure.
3.2 ALARM (MENU => ALARM)

Highlight ALARM in the main menu and move the joystick to the right to access ALARM setup.

```
ALARM SETUP

<table>
<thead>
<tr>
<th>NO</th>
<th>FUNC</th>
<th>PRI</th>
<th>IN</th>
<th>OUT</th>
<th>HLD</th>
<th>LATCH</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>P01</td>
<td>0</td>
<td>OFF</td>
<td>OFF</td>
<td>001</td>
<td>OFF</td>
</tr>
<tr>
<td>02</td>
<td>048</td>
<td>3</td>
<td>OFF</td>
<td>OFF</td>
<td>001</td>
<td>OFF</td>
</tr>
<tr>

<td>001</td>
<td>OFF</td>
</tr>
<tr>
<td>04</td>
<td>---</td>
<td>3</td>
<td>OFF</td>
<td>OFF</td>
<td>001</td>
<td>OFF</td>
</tr>
</tbody>
</table>
```

NO : Alarm input number

FUNC : Priority 1~4 calls Preset(xxx),
      Priority 0 supports dedicated functions like a Pattern(Pxx), Tour(Txx), Scan(Sxx).

PRI : Lower No. has higher priority, Equal priority alarms will be serviced repeatedly.

IN : NO/NC - normally open /Closed, OFF - ignore

OUT : R01 - Relay out 1, OFF - No output.

HLD : Alarm will be held for programmed time (01 to 99 seconds)

LATCH : ON - Shows all alarms including past alarm, OFF - Shows activated alarms only.

There are 5 levels of priority. 0 : Highest priority supports repeated/dedicated functions like a Pattern(Pxx), Tour(Txx), Scan(Sxx).
1~4: Same level of alarm calls presets one after the other.
Ex) Alarm 01 calls Pattern 01, after alarm 01 is released alarm 02, 03 will call preset 48 and preset 01
1. Press Menu to display the main menu on the monitor. Select the Alarm option by moving the Joystick up/down and then move to the right to enter the detail menu.
2. Select the alarm input number by moving the Joystick up or down and select the column to setup. Selected position will be highlighted.
3. Select the Preset, Status of Input (NC/NO/OFF), and Output (R01/OFF) by moving the Joystick to the right or to the left.
4. To increase or decrease the preset number or to change the status or output number, twist the Joystick clockwise or counterclockwise. In case of preset, programmed preset number will be scrolled.
5. Locate the cursor on Save and exit and moving the Joystick to the Save and exit. Press ESC to exit the program without saving.

3.3 SCREEN

By pressing the MENU button on the keyboard controller, the following On-screen MAIN MENU will be shown on the monitor screen.

```
MAIN MENU
FUNCTIONS
ALARM
SCREEN
CAMERA
SETUP
EXIT
```

Highlight SCREEN and then move the joystick to the right to enter SCREEN menu.

```
SCREEN MENU
LANGUAGE
PRIVACY ZONE
NORTH DIRECTION : 000.0
ZONE TITLE
CAMERA TITLE : DOME
OSD DISPLAY
EXIT
```
3.3.2 PRIVACY ZONE (MENU => SCREEN => PRIVACY ZONE)

Highlight PRIVACY ZONE and then move the joystick to the right to enter the menu.

This function disables the viewing of restricted areas for privacy reasons. It offers masking up to 8 unwanted views in a camera.

1. Select the Privacy Zone option by moving Joystick Up or Down and move the joystick to right to enter the detail menu.
2. Select the privacy zone number by moving the Joystick up or down.
3. To enter the zone name, rotate the handle clockwise or counterclockwise beneath the TITLE on set zone. Select alphanumeric characters by rotating the handle. Move to the next character position by moving the Joystick to the right. To finish entering the title, move the Joystick down or press the ENTR key.
4. To adjust the "marked" (privacy) area, (Twist the zoom handle to start PTZ control for view selection and hit the Focus button to exit from control mode.)
5. Use the Home key to delete the marked zone, or move the Joystick to the right or left to turn the stored zone On or Off.
6. Select the Save and Exit option by moving the Joystick up or down. Save and exit the program by moving the Joystick to the right. Press ESC to exit the program without saving.

Press the HOME or Off button to delete programmed privacy zone.

3.3.3 NORTH DIRECTION (MENU => SCREEN => NORTH DIRECTION)

Move the joystick handle to the right to select NORTH DIRECTION options.

1. Highlight North Direction and twist the Joystick to set desired direction. Press the focus button then current pan angle will be displayed on position item.

3.3.4 ZONE TITLE (MENU => SCREEN => ZONE TITLE)

Enter a specific name in sectioned angle between START and END.

<table>
<thead>
<tr>
<th>ZONE TITLE</th>
<th>01/04</th>
</tr>
</thead>
<tbody>
<tr>
<td>NO TITLE</td>
<td>START</td>
</tr>
<tr>
<td>01 WINDOW</td>
<td>123.4</td>
</tr>
<tr>
<td>02</td>
<td>-----</td>
</tr>
<tr>
<td>03</td>

</tr>
<tr>
<td>04</td>
<td>-----</td>
</tr>
<tr>
<td>05</td>
<td>-----</td>
</tr>
<tr>
<td>06</td>
<td>-----</td>
</tr>
<tr>
<td>PREV</td>
<td>NEXT</td>
</tr>
<tr>
<td>SAVE AND EXIT</td>
<td></td>
</tr>
</tbody>
</table>

1. Press MENU => SCREEN => ZONE TITLE to display zone title menu on the monitor.
2. Select the zone number by moving the Joystick up or down. Highlight Start and twist joystick to set start position. Press the focus to set desired direction. Tap joystick to highlight END, twist joystick and set end desired direction by pressing focus button.
3. To enter the zone name, rotate the handle clockwise or counterclockwise beneath the TITLE on set zone. Select alphanumeric characters by rotating the handle. Move to the next character by moving the Joystick to the right. To finish entering the title, move the Joystick down.
4. To adjust panning limit, highlight Start or End and twist joystick. Then use the Joystick to set the desired direction. The end limit must be in an increasing direction. (Start < End). press the Focus button to save and exit from control mode.

5. PREV   NEXT : go to previous page or next page of the menu

6. Save and exit the program by moving the Joystick to the right. Press ESC to exit the program without saving.

3.3.5 CAMERA TITLE (MENU => SCREEN => CAMERA TITLE)

Move the joystick handle to the right to select CAMERA TITLE options.

This function allows the users to set the title of camera as well as the usage of on screen display of the title.

Twist the joystick handle on the CAMERA TITLE : DOME to enter camera title. Select alphanumeric characters by rotating the handle. Move to the next character by moving the Joystick to the right. To finish entering the title, move the Joystick down.

3.3.6 OSD DISPLAY (MENU => SCREEN => OSD DISPLAY)

<table>
<thead>
<tr>
<th>Function Title</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>FUNCTION TITLE</td>
<td>ON</td>
</tr>
<tr>
<td>CAMERA TITLE</td>
<td>ON</td>
</tr>
<tr>

</tr>
<tr>
<td>ZOOM MAGNIFICATION</td>
<td>ON</td>
</tr>
<tr>
<td>FAN STOP WARNING</td>
<td>ON</td>
</tr>
<tr>
<td>EXIT MENU</td>
<td></td>
</tr>
</tbody>
</table>

**FUNCTION TITLE** : turn on or off the preset, pattern, scan, tour title display.

**CAMERA TITLE** : turn on or off the camera title display.

**ZONE TITLE** : turn on or off the zone title display.

**NORTH DIRECTION** : turn on or off the azimuth direction display.

**DOME POSITION** : turn on or off the coordinates display.

**DOME ID** : turn on or off the dome ID display.

**ZOOM MAGNIFICATION** : turn on or off the current zoom magnification level display.
3.4 CAMERA (MENU => CAMERA)

NOTE: The menu features will vary depending on the camera module.

CAMERA MENU

FOCUS CONTROL
WB CONTROL
EXPOSURE SETUP
BACK LIGHT : OFF
SHARPNESS : 31
DIGITAL ZOOM : OFF
   (2X/4X/MAX)
NIGHT SHOT
CAMERA INITIALIZE
SAVE AND EXIT

3.4.1 FOCUS CONTROL (MENU => CAMERA => FOCUS CONTROL)

CAMERA MENU

FOCUS CONTROL: AUTO

MODE : AUTO / ONE-PUSH / MANUAL

AUTO : Focus is automatically adjusted with moving zoom.
ONE-PUSH : Focus is automatically adjusted just once, after zoom position is changed.
MANUAL : Focus can be manually adjusted, independent of moving zoom.

CAUTION: Please avoid continuous, 24-hour use of the auto focus under heavy movement condition. This will shorten the lifespan of the lens.

3.4.2 WB (white balance) (MENU => CAMERA => WB CONTROL)

WB SETUP

MODE : OUTDOOR
R GAIN : 30
B GAIN : 40
EXIT
MODE MANUAL / OUTDOOR / INDOOR / AWC
R GAIN 0 ~ 100
B GAIN 0 ~ 100
Use the AWC mode for normal use.
RGAIN / BGAIN modes are controllable only in MANUAL Mode
Moving the Joystick to the right or left to change.

NOTE: “ONE PUSH” means that when rotating the Joystick handle for a moment the lens moves to adjust the focus for the subject. The focus lens then holds that position until the Joystick handle rotation.

3.4.3 AE CONTROL (MENU => CAMERA => EXPOSURE SETUP)

<table>
<thead>
<tr>
<th>EXPOSURE SETUP</th>
</tr>
</thead>
<tbody>
<tr>
<td>BRIGHT : 025</td>
</tr>
<tr>
<td>IRIS : AUTO</td>
</tr>
<tr>
<td>IRIS VALUE : 080</td>
</tr>
<tr>
<td>SHUTTER : ESC(NOR)</td>
</tr>
<tr>
<td>SHUTTER SPEED : 1/60</td>
</tr>
<tr>
<td>AGC : NORMAL</td>
</tr>
<tr>
<td>DNR(SSNR) : OFF</td>
</tr>
<tr>
<td>DSS : AUTO</td>
</tr>
<tr>
<td>EXIT MENU</td>
</tr>
</tbody>
</table>

BRIGHT : 0~100
IRIS : AUTO / MANUAL
IRIS VALUE : 0 ~ 100
SHUTTER : ESC(NOR) / MANUAL / A.FLK
SHUTTER SPEED : 2 ~ 1/120,000 sec
AGC : NORMAL / HIGH / OFF
DNR(SSNR) : OFF / LOW / MID. / HIGH
On screen noise reduction
DSS : AUTO / OFF
This feature ensures clear images at night or under low lighting conditions.

3.4.4 BACK LIGHT COMPENSATION (MENU => CAMERA => Back Light)

Objects in front of bright backgrounds will be clearer with BLC ON.
LOW / MID. / HIGH / OFF
3.4.5 SHARPENSS CONTROL (MENU => CAMERA => SHAPENESS)

Higher the value, outlines of the image will be enhanced (0~31)

3.4.6 DIGITAL ZOOM (MENU => CAMERA => DIGITAL ZOOM)

OFF - Optical zoom only
2x, 4x, Max. - Digitally magnifies up to 2x, 4x 10x respectively.

3.4.7 NIGHT SHOT MENU (MENU => CAMERA => NIGHT SHOT)

The NIGHT SHOT option removes the IR Cut filter of the camera and makes the camera sensitive to near infrared.
If NIGHT SHOT mode of the selected camera is set to Manual, 10+ ON will enable the NIGHT SHOT mode, 10+ OFF will turn off the NIGHT SHOT mode.

MODE : MANUAL / AUTO
AUTO – Camera automatically goes into B&W mode at low light.
MANUAL - Manually controls the Night Shot mode in LOCAL CONTROL option. On/Off Night Shot mode remotely by pressing 10+ ON/10+ OFF.

3.4.8 CAMERA INITIALIZE (MENU => CAMERA => CAMERA INITIALIZE)

Returns all changed camera values to factory default.
3.5 SETUP (MENU => SETUP)

CONFIGURATION MENU

FLIP FUNCTION : ON
P/T SPEED : FAST
PRESET FREEZE : OFF
PANNING RANGE : ON
TILT LIMIT : ON
CALIBRATION
LINE LOCK CONTROL
FACTORY DEFAULT
ERASE DATA
SYSTEM INFORMATION
SAVE AND EXIT

3.5.1 FLIP (MENU => SETUP => FLIP)

When the Speed Dome camera is mounted on a ceiling, it can track a moving target in a path directly below the camera:

**ON** - When the camera reaches the moving object directly above the floor, the dome camera tracks the object smoothly with a digitally corrected image.

**OFF** – The dome camera does not perform a flip.

3.5.2 SPEED (MENU => SETUP => SPEED)

User can select preferable speed curves of manual control. (FAST / MEDIUM / SLOW)

3.5.3 PRESET FREEZE (MENU => SETUP => PRESET FREEZE)

This option is used to set the pause previous image until the preset action is complete.

3.5.4 PANNING RANGE (MENU => SETUP => PANNING RANGE)
When the dome camera is installed near a wall or on a corner, panning range can be limited by user.

3.5.5 TILT LIMIT (MENU => SETUP => TILT LIMIT)

Turn Tilt Limit OFF to allow the camera to have full range of tilting ability from 0 to 180 degree.
Turn Tilt Limit On to limit the tilting range by up to +10 degree on both ends.
During zoom-out operation the tilting range is increased slightly by additional +10 degree.

3.5.6 CALIBRATION (MENU => SETUP => CALIBRATION)

- **RESET ORIGIN** : Calibrate the ORIGIN point.
- **OFFSET ORIGIN** : Adjust the small amount of position error from re-installation.
- **ACTIVE OFFSET** : Apply the adjustment above or not
- **AUTO CALIBRATION** : ON – When position error detected, recover automatically.
  OFF – Disregard the position error.

3.5.7 LINE LOCK CONTROL (MENU = SETUP => LINE LOCK CONTROL)

**LINE LOCK SETUP**
- **MODE** : INTERNAL
- **PHASE** : (0~359)
MODE INTERNAL / EXTERNAL Adjusts phase of picture with other cameras in EXTERNAL mode.

PHASE 0~359
EXIT (ESC TO EXIT)

3.5.8 FACTORY DEFAULT (MENU => SETUP => FACTORY DEFAULT)

FACTORY DEFAULT

ARE YOU SURE : (Y/N)
YES : ENTER OR MENU KEY
NO : ESC KEY

Programmed data go back to initial state as ex-factory

3.5.9 ERASE DATA (MENU => SETUP => ERASE DATA)

ERASE PROGRAMMED DATA

ARE YOU SURE : (Y/N)
YES : ENTER OR MENU KEY
NO : ESC KEY

Erase programmed data in the EEPROM of the selected dome camera. Press MENU or ENTER button to erase data, ESC key to exit without erasing. Origin offset value is not affected.

CAUTION: Unless you download the data into a safe place, all the data in the selected dome camera will be lost. (Refer to Download/Upload data function in the Keyboard Configuration utility)
This screen shows information of the dome camera for service or trouble shooting

</table>
**Glossary**

**ALARM ACTIONS**
The assigned responses of the dome camera when there is input status change. The dome may call Presets for each of the eight inputs. The dome reports the alarm states to the Keyboard controller for processing.

**AREA TITLE**
It is the name of the horizontal sector from a certain start point to end point of the selected dome. Up to 24 areas can be programmed for the dome.

**AUTOMATIC GAIN CONTROL (AGC)**
Allows for the amplification of the video signal in scenes with minimal ambient light. Many low-light scenes result in picture noise. As gain is increased, the picture noise is also amplified. When AGC is enabled, the value of the gain setting is based on feedback from the camera. When AGC is disabled, the camera uses the value set for the manual gain setting. The trade-off between picture level and noise may be adjusted when AGC is disabled.

**DIAGONALSCAN**
Move from start point to end point including tilt and zoom simultaneously and linearly.

**DIGITAL SLOW SHUTTER (DSS)**
DSS enhances video quality in extreme low-light situations. When the Low Shutter setting is enabled, low-light information is collected over multiple fields based on the Shutter Limit setting. As a result, video may appear blurred or choppy in extreme low-light situations. This setting does not effect camera operation in normal lighting situations. See also Automatic Gain Control (AGC).

**FLIP/DIGITAL FLIP**
It allows the dome to turn 180 degrees when the camera tilts to its lower limit. When the dome flips (rotates), the camera starts moving upward as long as the tilt control is kept in the down position. Once the control is released, the tilt control returns to its normal operational mode. The flip feature is useful when you need to track someone who walks directly beneath the dome and continues on the other side.
HOME POSITION
The default position to which the dome camera returns after an assigned period of inactivity passes. The default position may be a Preset, Tour, Pattern, or No Action.

INPUT ALARM
A connection point on the dome camera that enables the system to monitor Input Devices. There are four inputs available for the dome camera.

INPUT DEVICES
External devices that provide information about the condition of system components that connect to the inputs on the dome camera. Typical input devices include door contacts, motion detectors and smoke detectors.

IR MODE
A feature of the camera that permits manual or automatic switching between color and IR (black-and-white) operation. When IR mode is active, clearer images may be obtained under low-light conditions.

LINE LOCK
When line lock is enabled, it prevents vertical video rolling when switching multiple cameras to a single monitor. If text appears slightly tinted on color monitors, disabling the line lock may prevent this problem.

NORTH DIRECTION
User-definable setting that may correspond to magnetic north or some well-known landmark. Used to approximate the camera dome’s pointing direction when Direction Indicators are enabled.

ON-SCREEN MENU
The text overlay menu system used for setting dome features. This utility is accessed using a keystroke combination. The utility provides settings for camera functions, zoom, alarms, text display, and password protection.

PATTERN
A series of pan, tilt, zoom and focus movements from a single programmable dome. Up to 8 patterns may be programmed for the dome camera.

PRESET
Programmed video scene, based on a specific pan, tilt, zoom, and focus settings. Up to 240 presets may be programmed for the dome camera.

PRIVACY ZONES
Privacy zones are areas that are masked. These masks prevent operators of the surveillance system from viewing these designated zones. The Privacy Zones move in
relation to the dome camera’s pan/tilt position. In addition, the apparent size of the Privacy Zone adjusts automatically as the lens zooms in or out. Up to eight Privacy Zones may be established for a dome camera.

**SHUTTER LIMIT**
Setting used to define the maximum exposure time for the Open Shutter setting. The values for the setting range from 1/2 to 1/60. The default setting is 1/4.

**WHITE BALANCE**
Adjustments in the color hue (red and blue) gains for a camera so that true white appears white in the image. It is normally compensated for by the automatic gain control. In some lighting conditions, you may need to manually adjust the red and blue settings for optimal viewing. When Automatic White Balance is enabled, the camera measures the image and automatically adjusts the red and blue settings to balance white. When Automatic White Balance is disabled, the camera uses the values set for the red and blue settings to balance white.
VITEK LIMITED PRODUCT WARRANTY

VITEK products carry a three (3) year limited warranty. Digital recording and storage products are also warranted for 3 years except for the hard drives which carry their own independent factory warranty from the hard drive manufacturer. VITEK warrants to the purchaser that products manufactured by VITEK are free of any rightful claim of infringement or the like, and when used in the manner intended, will be free of defects in materials and workmanship for a period of three (3) years, or as otherwise stated above, from the date of purchase by the end user. This warranty is non-transferable and extends only to the original buyer or end user customer of a Vitek Authorized Reseller.

This warranty shall not apply to repairs or replacements necessitated by any cause beyond the control of VITEK, including but not limited to, acts of nature, improper installation, excess moisture, misuse, lack of proper maintenance, accident, voltage fluctuations, or any unauthorized tampering, repairs or modifications. This warranty becomes VOID in the event of alteration, defacement, or removal of serial numbers.

Within the first 6 months of purchase, VITEK will replace or credit any defective product at the request of the customer (subject to availability) with a new product that equals or exceeds the performance of the original product purchased.

Within the first 6 months of purchase, at its sole discretion, VITEK may issue an advance replacement for a defective product; however, all related costs including, but not limited to shipping and/or delivery charges will be the responsibility of the customer. If upon return inspection a product is determined to be in good working order or shows evidence of misuse, the customer will be responsible for full payment of the original product purchased as well as the replacement product.

Beyond the first 6 month period for the remainder of the warranty, VITEK’S responsibility shall be limited to repairing the defective product, including all necessary parts and related labor costs. At its sole discretion, VITEK may choose to either exchange a defective product or issue a merchandise credit towards future product purchases. Any replacement parts furnished in connection with this warranty shall be warranted for a period not to exceed the remaining balance of the original equipment warranty.

A Return Authorization number or “RA” number must be obtained prior to the return of any item for repair, replacement, or credit. VITEK requires that this “RA” number be clearly printed on the outside of the shipping carton to avoid refusal of said shipment. The Return Authorization number expires after 30 days. Products returned after the 30 day period will be subject to refusal. Shipping charges, if any, must be prepaid. A copy of the bill of sale (or invoice of purchase), together with a complete written explanation of the problem must accompany all returns.

Vitek makes no warranty or guarantee whatsoever with respect to products sold or purchased through unauthorized sales channels. Warranty support is available only if product is purchased through a Vitek Authorized Reseller.
